Yaroslav Repytun

Front-end Developer

About Me

Hello! I'm Yaroslav Repytun. Very active person who is ready for hard but interesting work and permanent self improvement as a developer. Result oriented, self-driven, highly motivated, willing to learn new technologies, methodologies, strategies and processes. Is going to do my best to overcome difculties and to be useful. Good understanding of responsive web design.

I'm worked in a company, in the position of "Junior Front-end Developer", the main direction of which was Ecommerce. The main part of the work consisted in transferring the prepared design to the platform site using Git or the available features in the site editor (js and css editors).

Additionally, we developed and proposed to implement on the site functionality that is not present on the platform, such as a product weight calculator, a new category and product ltering system, the introduction of auxiliary client APIs, supported the Ukrainian platform website.
